

We Provide Comprehensive Computer Solutions for Healthcare Providers

Our comprehensive approach to the specific technical needs of healthcare providers, enables our clients to rely on a single source for system sales, set up, custom solutions and ongoing system service. Entellica's advantages:

- ✓ We only supply the finest hardware and software from top manufacturers
- ✓ We install systems that are fully-HIPAA compliant, maintaining strict patient confidentiality and medical record security as top system configuration guidelines.
- ✓ We provide custom software to efficiently handle electronic medical records (EMR), helping our clients transition from inefficient and costly paper-based systems.
- ✓ We provide in-service training to ensure that all staff are comfortable with new systems and procedures.
- ✓ We provide flexible service plans matched to the needs of healthcare providers.

Contact Information:

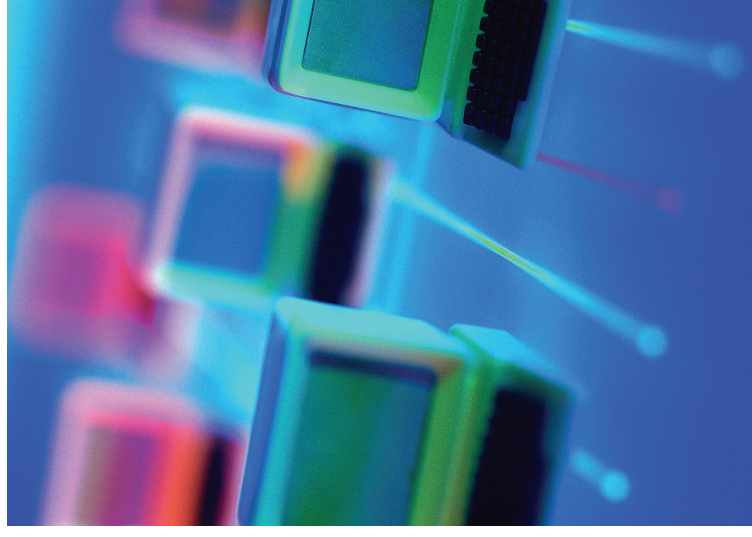

From San Diego to Santa Barbara, we support healthcare providers throughout the Southern California area. For more information about our comprehensive computer solutions for healthcare providers and ScriptFlow™, Entellica's EMR software, please contact:

Computer Solutions & Support
For Healthcare Providers

Technology For Healthcare

ScriptFlow™ Entellica's EMR Solution

Hardware

- Intel
- Hewlett-Packard
- Netgear
- ASUS

Software

- Certified Microsoft Partner
- Nuance Dragon Naturally Speaking
- F-Secure anti-virus software

Custom Solutions

- ScriptFlow Professional
- ScriptFlow Mobile

Set Up

- HIPAA-Compliant Systems
- Redundant Data Storage
- Comprehensive Systems Training

Support

- Hosted Services (Your data and, in some cases, your software may be stored on computers at our offices instantly backed up by our backup equipment and by our staff but remotely accessible by yours)
- Remote TLC Services (Through our Terminal Link and Correction service, we can fix many problems remotely)
- On-site Computer Service

Storing patient data as electronic medical records (EMR) enables faster and more accurate billing, easier exchange of patient records, greater legal protection for medical practitioners and lower medical costs. ScriptFlow™ from Entellica excels in every aspect of EMR creation, transfer and storage and offers these outstanding features:

- Checkbox, handwriting (digital signature), voice or typed EMR creation
- A simple easy-to-use interface that is universally accessible over the Internet via desktops and mobile devices (e.g., Laptops, TabletPCs, PDA's, SmartPhones)
- Point-to-point automated transfer of records (workflow)
- HIPAA-compliant record security
- Simplified inter-system data conversion
Data created via ScriptFlow's simple interface may be readily converted for transfer to other proprietary EMR or billing systems employed by other hospitals or practices. This feature enables users to work with a single interface yet be able to send records to many diverse systems.
- Handles template or free-form data entry
- May be scaled to any size practice
- The industry's most flexible EMR solution
